

Environmental Policy

Denmaur Independent Papers Ltd is committed to environmental responsibility.

We acknowledge our obligations to address the environmental impacts associated with our business activities, and to ensure compliance with statutory and regulatory requirements that are relevant to our business sector.

We have implemented an ISO 14001 certified Environmental Management System (EMS) for reducing and minimising our environmental aspects, which have been identified as: paper sourcing, office and warehouse functions, paper and board conversion and transportation.

Our EMS has set objectives, targets and programmes that are subject to an annual review, and documented procedures and records for monitoring and measuring our performance.

Our performance is maintained through corrective action and continual improvement, as well as compliance evaluation, staff training, auditing (internal and external) and stakeholder communication.

This policy is publically available. It will be reviewed at least annually and revised where necessary.

Danny Doogan
Marketing and Sustainability Director
