A CARBON BALANCED COMPANY

Introduction

One of the three mills within the Arctic Paper Group, Arctic Paper Grycksbo is a well-known manufacturer of high quality, coated woodfree paper. Located in the heart of Dalarna in Sweden, the Grycksbo mill originates from 1740, demonstrating a long and successful tradition of papermaking and continuous improvement.

Today, under the paper brands G and Arctic Volume, Grycksbo produces a distinct range of woodfree coated papers for the printing of books, magazines, posters, maps and advertising material.

Grycksbo strives to be one of the most sustainable mills in Europe. Together, with highly certified raw materials and manufacturing processes, Grycksbo's production is almost 100% fossil free with energy provided by its bio boiler, supplemented only by green electricity sources. In 2007, the Grycksbo mill was one of the first Swedish companies to achieve the European environmental management system (EMAS).

The other paper mills within the Arctic Paper group are Munkedals in Sweden and Kostrzyn in Poland.

Facts & Figures

5 distinctive graphical
paper products

220,000 tonnes/year
Production Capacity

337
Employees (2024)

92%
of production is exported

2 paper machines with a trim-width of 2.52m and 3.86m

Papers

- Arctic Volume Ice
- Arctic Volume White
- Arctic Matt
- Arctic Silk
- Arctic Snow
- G Print

Cradle to Cradle Certification®

The Cradle to Cradle Certified Product Standard guides designers and manufacturers through a continual improvement process that looks at a product's sustainability through five quality categories: material health, material reutilization, renewable energy and carbon management, water stewardship, and social fairness.

The full product range of Arctic Paper Grycksbo has been awarded a Silver Level Material Health Certificate as part of the multi-attribute Cradle to Cradle Certified Products Standard. In addition, the entire production process of the mill in Grycksbo was inspected and achieved the Silver Level which therefore represents the overall level of product certification.

Certifications

In addition to C2C certification, the Grycksbo mill is certified to the ISO 9001(quality), 14001(environmental) and 50001(energy) standards.

Grade	FSC®	PEFC	ECF	C2C®	HP Indigo
