

# Burgo Ardennes

meet  
the  
mill

with  
**denmaur**   
A CARBON BALANCED COMPANY

## Introduction

Burgo's Ardennes paper mill is part of the Italian group Burgo Group, one of Europe's leading producers of coated and specialty papers.

The Ardennes mill has been owned by the Burgo Group since 1994. Today, as an integrated mill, it produces paper pulp and high-end coated paper for commercial print and publishing.

Located in the heart of Gaume, near the Luxemburg border, it is one of the main economic contributors of the region, employing more than 700 people. It is the nearest producer to the UK of woodfree coated paper.

The Burgo group has recently published Go 2030, its commitment to the circular economy and sustainable development, in which the first of its green plants will be Ardennes.

## Facts & Figures

**400,000** tonnes/year

Pulp Capacity

**380,000** tonnes/year

Paper Capacity

**90 - 350** g/m<sup>2</sup>

Paper Weights

In-house energy sources  
Biomass plants and steam  
cycle cogeneration plant

**1,500,000** tonnes/year

Wood from local forests

Location  
Nearest WFC producer  
to the UK

# Sustainability

Zero fossil fuel power!

Ardennes will be the first Burgo mill with a net zero target in the next years.

The construction of a photovoltaic park is already underway on a section of land next to the magnificent paper hall. It is intended for the site to be powered by a combination of solar power and biomass fuel, derived from waste wood and bark.

## Production and product certificates:

## The Dependable Choice for All Print

The triple coated high white Amadeus Silk and Gloss as well as Revive 50% Recycled Silk are produced at this mill for HSWO, sheet-fed litho and CutStar print production.

Mill making cycles operate on a very regular basis to provide exceptional lead times, although the mill also holds standard sheets and cutter reels as back-up stock for emergency requirements.

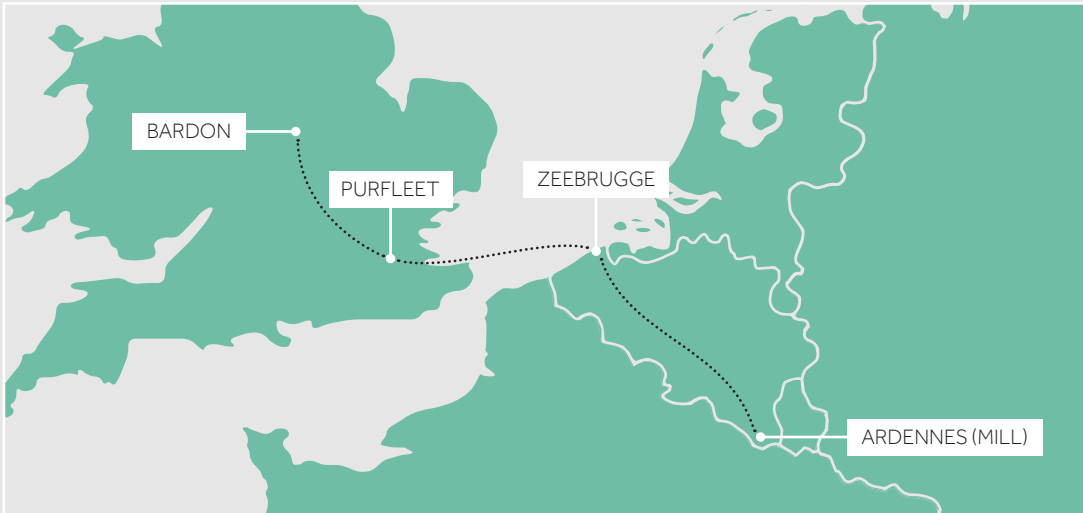

The Amadeus and Revive 50% Recycled Silk ranges are stocked extensively by Denmaur for next day delivery throughout the UK. Furthermore, Amadeus Silk is also one of the grades used for Denmaur's Reel Fast bespoke sheeting service.

Both the Amadeus and Revive 50% Silk ranges are FSC certified\* and Carbon Balanced.

\*PEFC certification available on request

 choice	 quality
 sustainability	 performance
 versatility	 reliability

## Delivery Carbon Footprint from the Mill

CO2 calculations based on recent Defra transport data

Road	Mill to Zeebrugge	19.285 kgs per tonne of paper
Sea	Zeebrugge to Purfleet	6.602 kgs per tonne of paper
Road	Purfleet to Denmaur Bardon	21.865 kgs per tonne of paper
<b>Total</b>		<b>47.751 kgs per tonne of paper</b>
