

Protect Gloss Wet

PRINT LAMINATION FILM

Available in Thermal

The Protect Gloss Wet is an acrylic coated, biaxially oriented polypropylene foil; the thickness of the film is 20 μm ($\pm 5\%$); the foil can be used for materials of various kinds.

It is suitable for lamination with all commercial adhesives (water based, solvent free, solvent based).

FEATURES:

- high-gloss, lubricious surface
- scratch-proof
- good tear resistance
- odorless
- suitable for hot stamping (test required)
- suitable for spot coatings with radical UV-curing systems (test required)
- glueable (test required / tests made on a folder gluing machine with different water-based glues brought a good result).
