

Rough Wet

PRINT LAMINATION FILM

Available in Thermal

The Rough Wet is an acrylic coated, sand structured, biaxially oriented polypropylene foil; the thickness of the film is 45 μm ($\pm 10\%$); the foil can be used for materials of various kinds. It is suitable for lamination with all commercial adhesives (water based, solvent free, solvent based).

FEATURES:

- scratch-proof
- good tear resistance
- odorless
- gluability, printability and hot stamping applications possible in principle, but the structure may make conditions more difficult and pre-tests are required. Overcoating is possible in screen printing and digital printing. A minimum of 12 g/m² coating is needed to cover the uneven surface.
