

Wood Wet

PRINT LAMINATION FILM

Available in Thermal

The Wood Wet is a partially acrylic coated, wood structured, biaxially oriented polypropylene foil; the thickness of the film is 30 µm (± 5 %); the foil can be used for materials of various kinds.

It is suitable for lamination with all commercial adhesives (water based, solvent free, solvent based).

FEATURES:

- scratch-proof
- good tear resistance
- odorless
- better separability
- better planarity
- adhesive saving (no structure on backside of the film)
- gluability, printability and hot stamping applications possible in principle, but the structure may make conditions more difficult

THERMAL:

FILM TYPE:	Thermal Gloss
THICKNESS:	30µm ±5%
WEIGHT:	17.43g/m ²
YIELD:	57.737 m ² /kg
SURFACE ENERGY:	min. 40 mN/m**
GLOSS 60 °C:*	7.0***

* Values are subject to change.

** Cannot be measured exactly due to uneven structure.

*** The gloss points are for orientation only due to the uneven structure.
